

Response rate: 2/82 = 2%

Maximum Margin of Error: 68.87

Greater Egleston High

Due to a low response rate, there is greater uncertainty about whether the responses accurately represent the parent population.

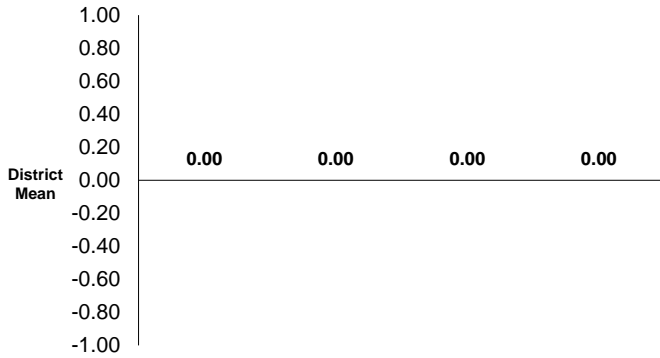

Averages for School Climate Variables

Standardized Climate Scores Compared to the District

Your school's standardized score indicates the extent to which your mean score deviates (positively or negatively) from the district average. It is a way to compare how well respondents at your school rated each variable compared to other respondents across the district.

Standardized Climate Scores Compared to High

Your school's standardized score indicates the extent to which your school's mean score deviates (positively or negatively) from the average of all similar schools (elementary, K8, middle or high schools). It is a way to compare how well respondents at your school rated each variable compared to respondents from similar schools.
