Suspensions

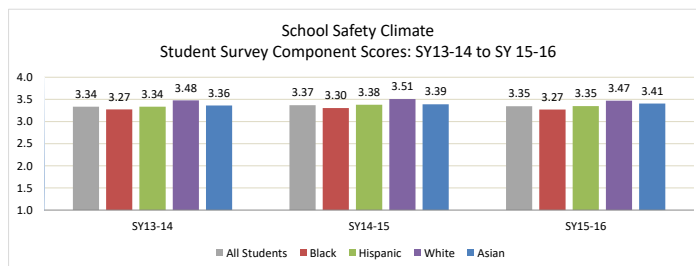

This graph compares the percentage of students who were suspended one or more times during the school year over the last four school years. These data only include out-of-school suspensions. Data are not reported for disciplined student groups less than 6 students. NOTE: the total number of students includes any student reported as enrolled to the state throughout the year.

Student Climate: School Safety

Average student component score for questions on school safety from the Student Climate Survey. Results are calculated by taking the average score for the questions associated with this category from the survey, and is reported out on a 4 point scale. The Student Climate Survey is administered to students in grades 3 - 11.

DIBELS - Growth from BOY to EOY

These graphs illustrate student movement from one risk level to another. Each graph represents students at each risk level at the beginning of the year (well-below/red, below/yellow, benchmark/green). Each bar then shows how those same students did at the end of the year. Only students who took both the BOY and EOY assessment in grades K2-2 are included.
