## Background

- This report presents the results of the MCAS tests administered in 2011 in English Language Arts (ELA) grades 3-8 and 10; Mathematics grades 3-8 and 10; and Science and Technology/Engineering (STE) grades 5, 8, and high school.

English Language Arts ${ }^{1}$

## Changes from 2010:

- The passing rate is up substantially in grade 7. Eighty-eight percent (88\%) of $7^{\text {th }}$ graders passed the ELA test, up 4 points compared to last year. Students at grades 5 and 8 also demonstrated gains in their passing rates, with a 2 point gain each.
- Grade 10 students saw a significant improvement in their proficiency rate. More than twothirds (67\%) of students at grade 10 scored at the Proficient level or higher, up 7 points compared to SY2009-10.
- Areas of concern include a 2-point drop in the passing rate for grade 3, down to $80 \%$; and grades 4 and 6 which saw a one-point drop each to $74 \%$ and $78 \%$ passing, respectively.
- The percentage of students who scored at the Proficient level or above increased or remained constant across all grades except grades 3 and 6 which experienced a 2-point decline each to $35 \%$ and $42 \%$, respectively.
- African American and Hispanic students saw gains in proficiency rates in grades 5, 7, 8, and 10. Hispanic students also demonstrated a 1-point increase in the $4^{\text {th }}$ grade proficiency rate. The $10^{\text {th }}$ grade gains are especially notable, with a 10 -point increase for Hispanic students (64\% proficient or above), and a 6-point increase for African American students (59\% proficient or above).
- ELL/FELL ${ }^{2}$ students saw a double-digit gain (11 points) in the $10^{\text {th }}$ grade proficiency rate, from $28 \%$ to $39 \%$. Similarly, ELL/FELLs in ${ }^{\text {th }}$ grade saw a 4-point gain in the proficiency rate, from $34 \%$ to $38 \%$. However, this group of students also experienced a large decline at grade 6 by six percentage points, from $37 \%$ to $31 \%$.
- The percentage of students with disabilities scoring at the Proficient level or above increased in all except grades 3 and 6 by one to seven points, with the largest gain made by $10^{\text {th }}$ grade students. However, the proficiency rates for this group of students remain at or below $25 \%$ across all grades.

## Comparisons with State:

- The improvement in passing rates exceeded or equaled state gains in three of the seven grades tested (grades 5, 7, and 8).

[^0]- Changes in the proficiency rates at grades $4,7,8$, and 10 also exceeded or equaled state gains.

## Mathematics

## Changes from 2010:

- The percentage of students passing Math in 2011 increased or remained constant in four of the seven tested grades, with a one-point gain in grades3 and 4, and a two-point increase in grade 5. There was however a drop in the passing rates in each of the middle grades (2point drop in grades 7 and 8, and one-point drop in grade 6).
- The proficiency rates in math increased in grades 4,5 , and 10 by 1,3 , and 2 points respectively. However, the proficiency rates declined for students in grade 7 (5-point drop from $38 \%$ to $33 \%$ ), and for grade 3 and 6 students (2-point drop in each grade).
- African American students saw a one-point gain in proficiency rates in grades 5 and 10. Hispanic students saw a notable gain of 7 percentage points in grade 5 and 2 points in grade 10. Asian students experienced improvement in their proficiency rate by 10 points in grade 4, two points in grade 3 and 1point in grade 10. White students saw gains in all grades except grades 3 and 7; the gains ranged from 1 to 6 points.
- ELL and former ELL students saw gains in their proficiency rates in grades 4, 5, and 10. Most notable were the 8-point increase in grades 5 and 10. ELL/FELLs experienced the largest drop in the proficiency rate in grade 7 ( 11 points), from $31 \%$ to $20 \%$.
- Students with disabilities also saw increases in their proficiency rates in grades 4,5 , and 8 . Fifth graders made the largest gain (4 points).

## Comparisons with State:

- The one-year gains in passing rates at grades 4 and 5 exceeded or equaled state gains.
- Increases in the proficiency rates in grades 4 and 10 also exceeded or equaled state gains.

## Long Term Trends in Racial Achievement Gap(Grade 10):

- In $10^{\text {th }}$ grade ELA, the gap in passing rates between Black and Hispanic students compared to White students has narrowed very significantly: from 35 points in 1998 to 5 points in 2011, with $91 \%$ or more students in every racial group passing the MCAS.
- The racial gap in proficiency rates in ELA is also smaller in $10^{\text {th }}$ grade both compared to last year and compared to 1998. However, at 22 percentage points (between White and Hispanic students) and 27 percentage points (between White and African American students), these gaps remain large.
- In $10^{\text {th }}$ grade Math, the gap in passing rates between African American and Hispanic students and their White peers has narrowed significantly since 1998, from 39 points to no more than 10 points.
- Despite the increase in proficiency rates for students of all racial groups, the proficiency gap in $10^{\text {th }}$ grade math has increased compared to 1998 for African American students
(from 28 to 31 points) compared to White students; it remains unchanged for Hispanic students (27 points).

## Science

Changes from 2010:

- The percentage of students passing one of the four science tests (Biology, Physics, Chemistry, or Technology/Engineering) in grade 10 increased by 2 points, from $80 \%$ to $82 \%$.
- Students in grade 5 experienced a notable decline in both the passing and proficiency rates (10 and 4-point declines, respectively). Students in grade 8 also saw a decline the passing rate, from $53 \%$ to $50 \%$.
- All four major racial/ethnic groups in grade 10 saw an increase in the percentage of students scoring Proficient or higher on the science tests, with the largest gain made by White students ( 9 points). Asian students in grade 8 and all racial/ethnic groups in grade 5 saw a decline in their proficiency rates. The largest drop was experienced by Asian students in grade 5 (12- point decline).
- Students with disabilities, low income students and English language learners experienced an improvement in their proficiency rates in science in grade 10, but saw a decline in grade 5.

## Comparisons with State:

- In grade 10, where passing a science test is a graduation requirement, the one-year gain in the passing rate exceeded statewide gains.

## High School - Competency Determination

- To date, $70 \%$ of the class of 2013 (grade10 students in SY2010-2011) has already met or partially met the state graduation requirements by passing the ELA, Mathematics, and Science tests. This represents a 13-point gain compared to the class of 2010 (57\%), the $1^{\text {st }}$ class that was required to pass Science as part of the new CD standard in order to be eligible to receive a high school diploma.
- Forty-eight percent (48\%) of the students in the class of 2013 have fully met the new CD standard by scoring at the Proficient level or higher in both ELA and Math and by scoring at the Needs Improvement level or higher in Science. This represents a 4-point gain compared to the classes of 2011 and 2012, and an 9-point increase compared to the class of 2010.
- Results of the high school Science \& Technology/Engineering tests show that a majority of students in the class of 2013 (77\%) have already met their new STE competency determination requirement.

Exceed or equal State gains

- Compared to 2010, the percentage of students passing ELA improved or remained constant in grades 5, 7, 8 and 10. Areas of concern include grade 3, which experienced a 2 point drop to $80 \%$ passing; and grades 4 and 6, which saw a 1-point drop to $74 \%$ and $78 \%$ passing, respectively.
- Five-year trends show that the passing rates improved by five or more percentage points in ELA in grades 7 and 10.
- Gains in passing rates since 2010 exceeded or equaled state gains in grades 5,7 , and 8.

Exceed or equal State gains

- Proficiency rates in ELA increased or remained constant in all grade levels except grades 3 and 6. Tenth grade students saw the most improvement with a 7-point increase. By contrast, students in grades 3 and 6 each experienced a 2-point drop in their proficiency rates.
- Since 2007, the proficiency rates of students in grades 7, 8, and 10 have increased by five or more percentage points.
- The 1-year gains in proficiency rates in grades 4, 7, 8 and 10 exceeded or equaled state gains.

|  |  |  |  |  |  | Percentage Points <br> Difference |

| Asian | 76\% | 80\% | 81\% | 80\% | 84\% | 4 |
| Latino/Hispanic | 43\% | 50\% | 59\% | 54\% | 64\% | 10 |
| White | 74\% | 79\% | 85\% | 78\% | 86\% | 8 |

- Between 2010 and 2011, students of all four major racial/ethnic groups in grades 5 and 10 saw an increase or remained constant in their percentage proficient or advanced in ELA. The largest gain in grade 5 was made by White students ( 5 points), and the largest gain in grade 10 was made by Hispanic/Latino students (10 points).
- In addition, notable improvements in proficiency rates were experienced by African American students in grade 7 ( 5 points), Asian students in grades 3 and 4 ( 5 and 4 points, respectively), Hispanic students in grades 7 and 8 (3 points each), and White students in grade 8 (5 points).

The largest drop in the ELA proficiency rate was experienced by African American students in grades 3 and 6 , and Asian students in grade 8.

- From 2010 to 2011, the proficiency gap between African American and White students widened by 1 to 4 percentage points in grades $3,5,6,8$, and 10 , while the gap narrowed markedly by five points in grade 7 and 1point in grade 4 . Hispanic students have narrowed the proficiency gap with White students in ELA by 1 to 3 percentage points in grades 3, 4, 6, 7, and 10 .

| Students w/ Disab | 10\% | 9\% | 11\% | 14\% | 19\% | 5 |
| ELL/FELL | 26\% | 16\% | 30\% | 38\% | 33\% | -5 |
| Low Income | 43\% | 42\% | 41\% | 45\% | 48\% | 3 |
| Grade 8 |  |  |  |  |  |  |
| Students w/ Disab | 18\% | 17\% | 21\% | 18\% | 24\% | 6 |
| ELL/FELL | 18\% | 20\% | 25\% | 35\% | 34\% | -1 |
| Low Income | 50\% | 51\% | 55\% | 53\% | 55\% | 2 |
| Grade 10 |  |  |  |  |  |  |
| Students w/ Disab | 12\% | 19\% | 23\% | 18\% | 25\% | 7 |
| ELL/FELL | 23\% | 27\% | 23\% | 28\% | 39\% | 11 |
| Low Income | 45\% | 54\% | 59\% | 54\% | 63\% | 9 |

- Compared to 2010, the percentage of students with disabilities, English language learners, and low-income students scoring Proficient or higher in ELA increased or remained unchanged at grades 4,5 , and 10 , while in grades 3 and 6 , students in each of these groups saw a 1 to 6 -point decline.
- Students with disabilities made notable gains in the ELA proficiency rate in grade 10 (7-point increase), grade 8 (6-point increase), and grade 7 (5-point increase). The proficiency rate for

ELL students improved by 11 points in grade 10 and four points in grade 4; and low-income students saw a 9 -point gain in grade 10 and 3-point gains in grades 5 and 7 .

- Compared to five years ago, all three student groups also made notable gains in the percentage of students scoring Proficient or higher in ELA, with the exception of grade 4.

Exceed or equal State gains

- The percentage of students passing Mathematics improved districtwide between 2010 and 2011 in three of seven grade levels tested. The passing rate in 2011 ranged from $62 \%$ in grade 8 to $86 \%$ in grade 10. Grade 5 students experienced a 2-point gain, and grades 3 and 4 students saw a 1-point gain since 2010.
- The improvement in passing rates exceeded or equaled the state-wide gains in grades 4 and 5 .
- Since 2007, the percentage of students scoring Needs Improvement or higher increased in every grade (ranging from 4 to 10 points); Grade 3 students have experienced the largest five-year gains (10 points).

| Grade 8 | 27\% | 34\% | 28\% | 34\% | 34\% | 0 | 45\% | 49\% | 48\% | 51\% | 52\% | 1 |
| Grade 10 | 55\% | 59\% | 62\% | 60\% | 62\% | 2 | 69\% | 72\% | 75\% | 75\% | 77\% | 2 |

- Compared to 2010, students in grades 4, 5, and 10 saw improvements in their proficiency rates in Mathematics. The one-year gains were most significant in grade 5 (3-point increase). An area of particular concern is grade 7, which saw a 5-point decrease in its proficiency rate to $33 \%$.
- In grades 4 and 10 , the 1 -year gains in proficiency rates exceeded or equaled state gains.
- Over a period of five years, the proficiency rates for all grades except grade 4 have increased by 5 points or more. Grade 5 students have seen 9-point gain since 2007.

| White | 74\% | 80\% | 82\% | 77\% | 83\% | 6 |

- In Mathematics, the percentage of students in all ethnic groups scoring proficient or advanced increased or remained unchanged in grades 5 and 10. Other notable gains in proficiency were experienced by Asian students in grade 4 ( 10 points) and White students in grades 8 and 10 ( 6 points each). Students of all racial/ethnic groups in grade 7 experienced a decline in their proficiency rates by 3 to 7 percentage points.
- The gap between African American and Hispanic students, and White students, decreased or remained constant in grades 5 and 7. Increases in the proficiency gap were most pronounced in grades 8 and 10 .

| Low Income | $52 \%$ | $57 \%$ | $58 \%$ | $56 \%$ | $57 \%$ | 1 |

- Since 2010, the proficiency rate in math for students with disabilities, English language learners, and low-income students improved in both grades 4 and grade 5. ELLs and low-income students also saw gains in grade 10. However, all three subgroups experienced a drop in grades 3, 6, and 7 .
- In 2011, less than a quarter of students with disabilities scored Proficient or higher in any grade level tested in math. The proficiency rate for English language learners ranged from 20\% in grade 7 to $51 \%$ in grade 10; and for low income students, it ranged from $25 \%$ in grade 4 to $57 \%$ in grade 10 .
- Since 2007, all three subgroups made notable gains in the percentage of students scoring Proficient or higher in Mathematic in almost all grades.

## Long Term Trends in Racial Achievement Gap (Grade 10)

MCAS Grade 10 ELA Results Percent Needs Improvement or Higher by Race/Ethnicity

* Beginning with 2004, the race/ethnicity data are based on SIMS file

MCAS Grade 10 ELA Results -
Percent Proficient and Advanced by Race/Ethnicity

* Beginning with 2004, the race/ethnicity data are based on SIMS file
- Since 1998, students of all races / ethnicities in grade 10 have seen a substantial improvement in their ELA passing and proficiency rates. African American and Hispanic students have seen the largest gains.
- The gap in passing rates for African American and Hispanic students compared to White students has reduced significantly over the 13 years period, and the proficiency gap also narrowed considerably.

* Beginning with 2004, the race/ethnicity data are based on SIMS file

MCAS Grade 10 Math Results -
Percent Proficient and Advanced by Race/Ethnicity

* Beginning with 2004, the race/ethnicity data are based on SIMS file
- Since 1998, students of all racial/ethnic groups have made substantial gains in the passing and proficiency rates on the grade 10 math test. Compared to 1998, Hispanic students saw the greatest gains in passing rates ( 71 percentage points), and Asian students had the largest increase in proficient rates ( 58 percentage points).
- While the gap in the passing rates between African American and Hispanic students, and White students has narrowed considerably since 1998, the proficiency gap has slightly increased for African American students and remained unchanged for Hispanic students.

# MCAS Science Results <br> Gains in Percent Passing, Proficient or Higher <br> 2010-2011 

Science and Technology / Engineering \% Passing (Needs Improvement or higher)
State

Exceed or equal State gains

* Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10;
only students continuously enrolled in the same district from fall of grade 9 through spring of grade 10 are included.
- The percentage of students passing science improved by 2 percentage points at the high school level, while students in the other two tested grades (grades 5 and 8) showed a drop in their passing rates.
- The 1 -year gain in the passing rate made by $10^{\text {th }}$ grade students exceeded state gains.
- In 2011, only slightly more than half of grade 5 and half of grade 8 students passed the science test. On the high-stakes high school science tests, $82 \%$ of students had passed science by the $10^{\text {th }}$ grade.
- Since 2008, students in grade 10 have made notable improvements in the science passing rate.

| White | N/A | $55 \%$ | $63 \%$ | $60 \%$ | $69 \%$ | 9 |

[^1]- The percentage of students reaching proficiency increased for all racial/ethnic groups in grade 10 by two to nine percentage points, with the largest gain made by White students; Asian students also saw a notable increase (five points). However, students of all racial/ethnic groups in grade 5 experienced declines in their proficiency rates.
- African American and Hispanic students have narrowed slightly the proficiency gap compared to their White peers in grade 5 science, but the gaps are significantly higher in high school science, and about the same in grade 8.

## Science Technology/Engineering \% Proficient \& Advancedby other AYP Subgroups

| 2007 |  | 2008 |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

Grade 5

| ELL/FELL | N/A | $18 \%$ | $12 \%$ | $17 \%$ | $20 \%$ | 3 |
| Low Income | N/A | $23 \%$ | $27 \%$ | $29 \%$ | $32 \%$ | 3 |

[^2]- On the high school science tests, students with disabilities, ELL/FELLs, and Low Income students all saw some gains in proficiency rates. Students with disabilities in grade 8 also saw a 1-point gain.
- There is little change in the proficiency rates for $5^{\text {th }}$ and $8^{\text {th }}$ graders in science since 2008. Only $10^{\text {th }}$ graders who are members of these three student groups have seen progress.

To earn a high school diploma, students in Massachusetts must meet the Commonwealth's Competency Determination (CD) standard in addition to all local graduation requirements. The CD requirement was established as part of the Massachusetts Education Reform Act of 1993 to ensure that students graduating from school have the knowledge and skills they need to succeed in college and workplace.
Starting with the class of 2010, students must meet or exceed the Proficient threshold scaled score of 240 on the English Language Arts and Mathematics grade 10 MCAS tests. Students who earn a scaled score between 220 and 238 in English Language Arts and Mathematics must also fulfill the requirements of an Educational Proficiency Plan (EPP)*. Students in the class of 2010 and beyond must also pass a discipline- specific high school MCAS Science test in Biology, Chemistry, Introductory Physics, or Technology/Engineering by meeting or exceeding the Needs Improvement threshold score of 220 on the test.

The following chart shows the cumulative percentages of all students in the class of 2013 (grade 10 students in SY2010-2011) who took and passed the grade 10 MCAS tests in ELA, Mathematics, Science, and in all three subjects combined, through the spring 2011 test administration.

Class of 2013: Percentage of Students Scoring Needs Improvement or Higher in ELA, Mathematics, and Science and Technology/Engineering through Spring 2011

[^3]The table below displays the cumulative percentages of all students and student subgroups in the class of 2013 who have already met or partially met the state's graduation requirements by performing at the Needs Improvement level or higher in ELA, Mathematics, and Science through the spring 2011 test administration.

Class of 2013: Percentage of Students Scoring Needs Improvement or Higher in ELA, Math, and STE through the Spring 2011 Administration

* Class of 2012 results were through the Spring 2010 administration,

Class of 2011 results were through the Spring 2009 administration,
Class of 2010 results were through the Spring 2008 Administration.

- More than two-thirds ( $70 \%$ ) of students in the class of 2013 performed at the Needs Improvement level or higher in all three subjects on their first attempt, 13 percentage points higher than students in the class of 2010, which was the first class of students required to meet the new CD standard in order to be eligible to receive a high school diploma.
- Students of all racial and AYP categories have seen an increase in their passing rates on all three exams since the Class of 2010.
- Seventy-seven percent (77\%) of the class of 2013 scored at the Needs Improvement level or higher in both ELA and math.
- Asian students were most likely to have passed all three tests (87\%) in their first attempt, followed by White students (85\%), African American students (65\%), and Hispanic students (63\%).
- More than a third (37\%) of students with disabilities performed at the Needs Improvement level or higher in all subjects, while more than half (54\%) of English language learners and twothirds (66\%) of low-income students did so.
- ELL/FELLs saw a 12-point gain in the percentage of students who passed all three exams compared to the class of 2012.

The following table presents the number and cumulative percentage of students in the class of 2013 who have already fully met the CD standard by performing at the Proficient level or higher in both

ELA and Mathematics and by performing at the Needs Improvement level or higher in STE through the spring 2011 test administration.

Class of 2013: Number and Percentage of Students Scoring Proficient or Higher in ELA and Mathematics and Needs Improvement or Higher in STE through the Spring 2011 Administration.

|  | Class of 2013 (N=4149) |  | Class of <br> 2012* | Class of <br> 2011* | Class of <br> 2010* |
| :--- | :---: | :---: | :---: | :---: | :---: |
| CD Requirement | Number | Percent | Percent | Percent | Percent |
| Earned CD | 1,987 | $\mathbf{4 8 \%}$ | $44 \%$ | $44 \%$ | $39 \%$ |
| ELA and Mathematics Proficient or Higher | 2,025 | $\mathbf{4 9 \%}$ | $45 \%$ | $46 \%$ | $42 \%$ |
| ELA Proficient or Higher | 2,554 | $\mathbf{6 2 \%}$ | $54 \%$ | $58 \%$ | $52 \%$ |
| Mathematics Proficient or Higher | 2,352 | $\mathbf{5 7 \%}$ | $55 \%$ | $56 \%$ | $52 \%$ |
| STE Needs Improvement or Higher | 3,190 | $\mathbf{7 7 \%}$ | $73 \%$ | $73 \%$ | $61 \%$ |

* Class of 2012 results were through the Spring 2010 administration,

Class of 2011 results were through the Spring 2009 administration,
Class of 2010 results were through the Spring 2008 Administration.

- Forty-eight percent of students ( $48 \%$ ) in the class of 2013 earned a CD by performing at the Proficient level or higher in both ELA and Math and performing at the Needs Improvement level or better in Science.
- For the individual components of the CD requirement, nearly half (49\%) of the students met the CD requirements in both ELA and Math, 62 percent of students performed at the Proficient level or higher in ELA, 57 percent of students achieved Proficient or higher in Mathematics, and more than three-fourths (77\%) of students performed at the Needs Improvement level or higher in Science.
- Compared to the previous three classes (2010 through 2012), a higher percentage of students in the class of 2013 has met each of the CD requirements.

## Appendix A: MCAS Background

The Massachusetts Comprehensive Assessment System (MCAS) was developed as part of the Massachusetts Educational Reform Act of 1993. It was designed to measure how well students, schools and districts are performing on the state's learning standards that are contained in the Massachusetts Curriculum Frameworks. Because Boston's own Citywide Learning Standards are correlated with the state's Curriculum Frameworks, the MCAS helps educators, parents, students and the wider community know how well BPS students are doing with respect to Boston's own standards. The MCAS was first administered in May 1998 in grades 4, 8, and 10. The March/April/May 2011 testing is the fourteenth annual administration of the MCAS tests. Tests were administered in ELA and Math in grades 3-8 and 10 and Science and Technology in grades 5, 8, 9 and 10. The High school Science and Technology/Engineering test includes Biology, Chemistry, Introductory Physics, and Technology/Engineering that became operational in 2007. However, the History and Social Science tests that were administered in 2007 and 2008 in grades 5, 7 and 10/11, and were slated to go fully operational in spring 2009 were suspended. In February 2009, due to fiscal considerations, the Board of Elementary and Secondary Education approved a two-year (2009 and 2010) suspension of operational MCAS History and Social Science test and waived the Competency Determination requirement in this subject area for the classes of 2012 and 2013. In August 2010, the Board of Elementary and Secondary Education again voted to delay MCAS testing in history and social science, which was scheduled to resume in spring 2011 because of a further decline in the state budget. As a result, no History and Social Science tests were administered in grade 5, grade 7, or high school in spring 2011.

As a part of the state's graduation requirements, students in the Class of 2010 and subsequent classes, are required to meet or exceed the minimum Proficient score on both the ELA and Mathematics MCAS grade 10 tests. Students who scored at the Needs Improvement performance level will have to fulfill the requirements of an Educational Proficiency Plan (EPP). Additionally, students in the Class of 2010 and beyond have to meet or exceed the minimum Needs Improvement score in a high school Science Technology/Engineering test in Biology, Chemistry, Introductory Physics, or Technology/Engineering.

No Child Left Behind (NCLB) requirements mandate that all students attain Proficient and Advanced by 2014.
The MCAS was intended by its framers to measure the performance of students, schools and districts with respect to statewide standards, and thus to be used for accountability purposes. As such, the MCAS is a criterion-referenced standardized test in which students' performance is compared to standards, not a norm-referenced test in which students are compared to other students' performance. The MCAS was also intended to improve classroom instruction both by giving detailed feedback about student performance and by providing models of effective assessment methods. In the spring of 2011, all students in grades 3-10 statewide, in all publicly funded schools, including BPS Pilot Schools and statewide charter schools were required to take the MCAS.

## What Are The MCAS Tests Like?

Content areas covered include English/Language Arts, Mathematics, Science \& Technology/Engineering and History and Social Science (suspended for 2009, 2010 \& 2011). Testing occurs from grade 3 through 10, although not all content areas are covered at each grade.

## MCAS Grade Levels and Content Areas Tests in 2011 - Summary Data Reported

| Grade | English Language Arts | Mathematics | Science and Technologyl <br> Engineering |
| :---: | :---: | :---: | :---: |
| 3 | X | X |  |
| 4 | X | X |  |
| 5 | X | X | X |
| 6 | X | X |  |
| 7 | X | X |  |
| 8 | X | X | X |
| 9 |  |  | $\mathrm{X}^{\text {a }}$ |
| 10 | X | X | $\mathrm{X}^{\text {a }}$ |
| a Students may take one of four high school STE tests offered in Biology, Chemistry, Introductory Physics, and Technology/Enginering in grade 9 or grade 10. |  |  |  |

The test is designed to be untimed, with the expected testing times for each test ranging from two to seven hours.

There is a mixture of question formats. Multiple choice and open response items (one to two paragraphs, a graph or a chart, as appropriate) are found on all tests. Short answer items appeared on the Mathematics test only, also, shortresponse items are used in grade 3 ELA test (beginning in 2010) only. Finally, the English/Language Arts test included writing prompts in grades 4,7 and 10.

The tests are designed to be rigorous. They are also intended to be cumulative of the learning standards up to the grade of testing. For example, the grade 4 tests might well contain items related to third grade learning standards from the Curriculum Frameworks.

Eighty percent of the items on each test for each grade are "common items" seen by all students in a given test. These and only these are the basis of all official summary scores. Prior to 2009, these questions were released by the state each year after testing is complete. Beginning in 2009, the Massachusetts Department of Elementary and Secondary Education (MA DESE) only release approximately 50 percent of the common items for grades $3-8$ and all of the common items at the high school level including the English/Spanish edition of the grade 10 Mathematics test (except the Chemistry and Technology/Engineering tests, for which no common items were released in 2009) are released.

The other $20 \%$ of the items are "matrix sampled". These items are used to equate MCAS test s from year to year and to field test new items for future tests. These items also are used along with the common items at the school and district levels to provide subject area subscores.

## How Is Student Performance On The MCAS Scored And Reported?

## Scoring

Multiple choice items are all scored 0 or 1 and are scanned and scored electronically.
All others items are read and scored by trained staff, many of whom are teachers. Short-answer items on the Mathematics test are scored 0 or 1 . Short-Response items on the grade 3 ELA test are worth up to 2 points per item. Openresponse items are scored on a 0 to 4 scale, except in grade 3 Mathematics which is scored on a 0 to 2 scale, which are scores according to rubrics developed by the Assessment Development Committees and a selection of "benchmark" responses (samples of student work representing each of the score points for each question). Compositions on the English/Language Arts test are rated on a scale of 0 to 20.

## Reporting

Summary scores are reported as Performance Levels, defined with respect to the State's Curriculum Frameworks. These are defined as follows:

Advanced ${ }^{3}$ : Students at this level demonstrate a comprehensive and in-depth understanding of rigorous subject matter and provide sophisticated solutions to complex problems.

Proficient: Students at this level demonstrate a solid understanding of challenging subject matter and solve a wide variety of problems.

Needs Improvement: Students at this level demonstrate a partial understanding of subject matter and solve some simple problems.

Warning/Failing: Students at this level demonstrate a minimal understanding of subject matter and do not solve even simple problems. The term Failing is applicable to grades 9 and 10 only.

Students' standings on these Performance Levels are the major scores reported and compared across schools and districts. Scores are reported for each test separately; there is no overall score.

[^4]Test performance is also reported as scaled scores ranging from 200 to 280 for all grades. At grade 3, 2010 was the first year in which student results are reported as scaled scores; prior to 2010, only raw score points representing the total number of points a student earned were reported. The scaled scores provide information concerning students' relative standing within a Performance Level. The scaled score range corresponding to each performance level is as follows: Advanced - 260 to 280, Proficient - 240 to 258, Needs Improvement - 220 to 238, and Warning/Failing - 200 to 218.

## Testing Population

In keeping with state and federal regulations, virtually all students statewide are tested.

## Students with Disabilities

Students with Disabilities were defined as those who either had an Individualized Education Plan (IEP) or received instructional accommodations provided under Section 504 of the Rehabilitation Act of 1973.

Students with Disabilities were expected to take the test in accordance with the Massachusetts Education Reform Act and a 1997 amendment to the federal Individuals with Disabilities Education Act (IDEA). Testing accommodations were permitted if specified in the student's Individualized Education Plan (IEP) or 504 plans. The state's detailed list of approved accommodations included modifications to the timing and scheduling of the test, the setting of the test, how the items were presented to the student, and how the student provided the answers. The actual test content could not be modified. Students with significant cognitive disabilities who are unable to take the standard MCAS tests even with accommodations are required to take the MCAS Alternate Assessment (MCAS-Alt). The MCAS-Alt enables these students to submit portfolios of their wok that demonstrate their performance on the curriculum framework learning standards.

## English Language Learners

According to MA DESE definitions, a English language learner (ELL) ${ }^{4}$ student is "a student whose first language is a language other than English who is unable to perform ordinary classroom work in English." All ELL students must participate in MCAS tests scheduled for their grades regardless of the program and services they are receiving or the amount of time they have been in the United States. The sole exception to this requirement applies to first-year ELL students (i.e., students who first enrolled in school in the United States after March 1, 2010). While schools have the option of testing first-year ELL students in English Language Arts (ELA), as per Federal guidelines issued in February 2004, all first-year ELL students must be assessed in Mathematics and Science and Technology/Engineering (STE) as required by the NCLB Law.

For MCAS reporting purposes, the results of first-year ELL students in 2011 who took the English Language Arts tests was not factored into school or district performance results, nor the results of these students’ Mathematics and Science ant Technology/Engineer tests, in accordance with NCLB allowances.

The federal government requires that states/districts continue to monitor the progress of ELL students who has transitioned out of ELL status (i.e., Former ELL) during the current school year or within the past two school years, the performance of combined ELL and former ELL students are reported and this reporting category represents the official AYP subgroup reporting category.

A Spanish version of the grade 10 Mathematics test was developed for Spanish-speaking ELL students. Grade 10 Span-ish-speaking ELL students who could read and write at grade 10 level or above in Spanish took the available Spanishlanguage Mathematics.

[^0]:    ${ }^{1}$ The ELA tests at grades $3,5,6$, and 8 assess reading comprehension, while the ELA tests at grades 4,7 , and 10 assess reading comprehension and writing.
    ${ }^{2}$ English language learners (ELL) were previously referred to as limited English proficient (LEP). Former English language learners were previously referred to as formerly limited English proficient (FLEP). The combined ELL and former ELL reporting category represents the official AYP subgroup reporting category.

[^1]:    * Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in the same district from fall of grade 9 through spring of grade 10 are included.

[^2]:    * Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in the same district from fall of grade 9 through spring of grade 10 are included.

[^3]:    * An Educational Proficiency Plan (EPP) must be developed for a student who has not met the minimum Proficient level score of 240 on either or both of the Grade 10 ELA and Grade 10 Mathematics MCAS tests. Each EPP must include, at a minimum:
    - a review of the student's strengths and weaknesses, based on MCAS and other assessment results, coursework, grades, and teacher input,
    - the courses the student will be required to take and successfully complete in grades 11 and 12, and
    - a description of the assessments the school will administer on a regular basis to determine if the student is moving toward proficiency.

    The assessment options for SY2010-2011 include locally developed end-of-course assessments, locally scored grade 10 MCAS test forms designed for the EPP, the March 2011 MCAS retest in ELA only, and College Board's Accuplacer.

[^4]:    ${ }^{3}$ Prior to 2011, the highest performance level at grade 3 was Above Proficient. This was changed to Advanced in 2011 to provide consistency in reporting.

[^5]:    ${ }^{4}$ English language learner (ELL) was previously referred to as limited English proficient (LEP).
