EXECUTIVE SUMMARY

The Trial Urban District Assessment (TUDA) was started in 2002 as a part of the National Assessment of Educational Progress (NAEP). The Boston Public Schools was one of eleven urban districts that voluntarily participated in the NAEP assessment on a trial basis. Boston participated in grade 4 and 8 reading and mathematics in 2003, 2005, and 2007. Data for districts are compared with other TUDA districts, Large Central Cities (LCC), and the Nation.

Overall 2007 Findings:

- **LCC's:** in grades 4 and 8 mathematics on average Boston scored higher than the LCCs. In grades 4 and 8 reading the average score was the same for Boston and LCCs.
- **Other TUDA Districts:** performance in Boston in Grade 4 and 8 reading and mathematics is significantly higher than that in three other urban districts (Cleveland, Los Angeles, District of Columbia). For grade 8 mathematics, performance in Boston is significantly higher than all other TUDA districts except Austin, Charlotte, and Houston.

Improvement Overtime: Relative to Other TUDA Districts

- **Reading:** since 2003, Boston has continuously made progress in both grades 4 and 8. Compared with other TUDA districts, the improvement in percentage of students scoring at or above proficient in grade 4 (4 percentage points) for Boston was ranked second and tied with Charlotte, Chicago, San Diego and Washington DC, while in grade 8 the improvement was in the middle range (1 percentage point).
- **Mathematics:** since 2003, Boston had the most improvement among the TUDA districts, ranked first in both grades 4 and 8 and tied with San Diego in grade 4. The percentage of students scoring at or above proficient for Boston has substantially increased since 2003, 15 and 10 percentage points, respectively.

Improvement Overtime: by Racial/Ethnic Groups

- **Grade 4:** from 2003 to 2007 although scale score gains in reading were seen for all racial/ethnic groups, they were not statistically significant. In Mathematics, statistically significant scale score gains were seen for all groups. Gains ranged from 10 points (Black) to 16 points (White) compared to 2003 performance.
- **Grade 8:** Reading scores improved overtime for most groups. Although not statistically significant, improvements ranged from 1 point (Asian) to 5 points (Black). Hispanic performance decreased by 4 points. Statistically significant improvement was seen for all except Asian in grade 8 Mathematics. Compared to 2003 performance improvements ranged from 5 points (Asian) to 18 points (Hispanic).
- It should be noted that although improvements have been observed across the groups and are significant in Mathematics at both grades 4 and 8, the gaps in performance remain between Whites/Asians and Blacks/Hispanics.

Low-Income Students: Comparison Between Districts and Nation

- **Grade 4:** in reading, low-income students in Boston scored 2 points higher than the nation and scored the second highest of other TUDA districts. In grade 4 Mathematics, low-income students in Boston scored 3 points higher than the nation and were in the middle range of other TUDA districts.
- **Grade 8:** in both reading and Mathematics, low-income students in Boston scored on average 2 and 6 points higher than the nation. The grade 8 performance for children in poverty in Boston was the highest of all TUDA districts in both subject areas.

OVERVIEW AND BACKGROUND

In 2001, after discussion among the National Center for Education Statistics (NCES), the National Assessment Governing Board (NAGB), and the Council of the Great City Schools (CGCS), Congress appropriated funds for a district-level assessment on a trial basis, similar to the trial for state assessments that began in 1990, and NAGB passed a resolution approving the selection of urban districts for participation in the Trial Urban District Assessment (TUDA), a special project within NAEP. Representatives of the Council of Great City Schools worked with the staff of NAGB to identify districts to be invited for the trial assessment. Districts were selected that permitted testing of the feasibility of conducting NAEP over a range of characteristics, such as district size, minority concentrations, federal program participation, socioeconomic conditions, and percentages of students with disabilities (SD) and English Language Learners (ELL) students.

In 2002, five urban school districts participated in NAEP's first Trial Urban District Assessment (TUDA) in reading and writing. In 2003, ten urban districts (including the original five) participated in the TUDA in reading and mathematics at grades 4 and 8: Atlanta, Boston, Charlotte-Mecklenburg, Chicago, Cleveland, Houston, Los Angeles, New York City, San Diego, and Washington, D.C. In 2005, Austin was added to the group of school systems that participated in the testing. Only public-school students (non-charter) were sampled in the TUDA. For the ten districts that participated in 2003, there are comparative information from 2003 and 2005. For Austin, the comparative information is only available from 2005 to 2007.

Average scores are reported on a 0-500 scale. Large Central Cities (LCC) refers to the eleven districts reported in this trial study. Eight of the eleven urban districts consist entirely of schools in cities with a population of 250,000 or more (i.e., large central cities as defined by NCES); three of them (Austin, Charlotte and Los Angeles) consist primarily of schools in large central cities, but also have a number of their fourth and eighth grade students enrolled in surrounding suburban or rural areas. All of the data for the three districts were used to compare with data from large central cities and the nation.

An overview of the assessment framework and comparisons with the MCAS relative to design, reporting and format are included in Appendices A and B.

DEMOGRAPHIC CONTEXT

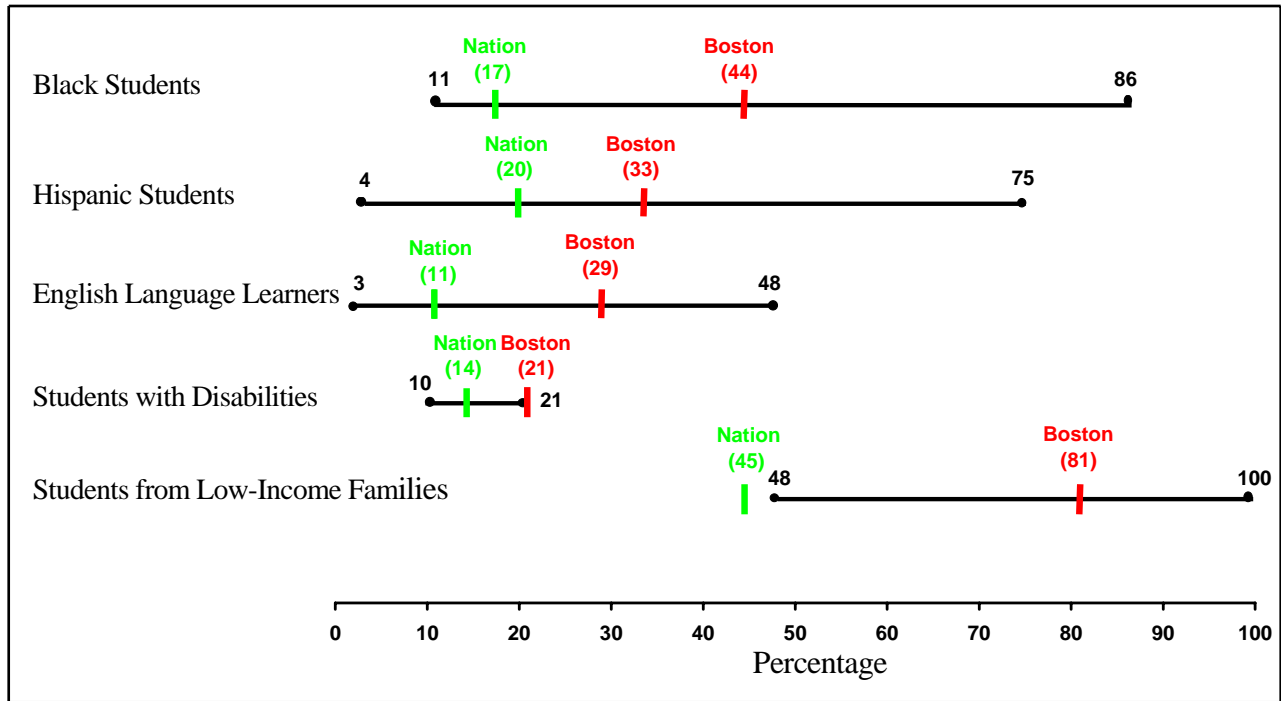

The graphic on the next page displays the percentages of subgroups (Black, Hispanic, English Language Learner, Students with Disabilities, Students from Low-Income Families) for the nation, for Boston Public Schools and the range for the TUDA districts. The percentages are based on grade 4 students who participated the 2007 TUDA NAEP Reading test.

For Black and Hispanic students, Boston's percentage is in the middle range of the other TUDA districts, while the percentage of ELL population is slightly higher. Of note is that over 80% of students in Boston receive free/reduced-price lunch. In addition, Boston has

the highest percent of students with disabilities that participated in the test. These aspects are important to keep in mind when reviewing the results.

In addition, because populations are sampled, examining statistical significance is critical to determine differences across groups.

Percentages: Range of Students in Selected Groups for TUDA Districts

ANALYSES

Performance is examined in four ways:

- (1) comparisons of average scaled scores with the other communities that participated in the TUDA project. This provides normative information relative to specific other large cities.
- (2) percent of students performing at or above the Proficiency Level overtime (2003, 2005, 2007). This provides information on the top level of student performance. Given that NCLB requires that all students must reach proficiency by 2014, it is useful to examine performance at this level.
- (3) performance of racial/ethnic groups overtime. This provides information on achievement issues for various subgroups.
- (4) Comparative performance of students of low-income backgrounds.

(1) Scale Score Comparisons of 2007 NAEP Between Boston and TUDA Districts

Subject Area Test	LCC*	Atlanta	Austin	Charlotte	Chicago	Cleveland	Houston	Los Angeles	N.Y.C.	San Diego	Dist. of Columbia
Grade 4 Reading	=	=	↓	↓	↑	↑	=	↑	=	=	↑
Grade 4 Math	↑	↑	↓	↓	↑	↑	=	↑	=	=	↑
Grade 8 Reading	=	↑	=	↓	=	↑	=	↑	=	=	↑
Grade 8 Math	↑	↑	↓	↓	↑	↑	=	↑	↑	↑	↑

* LCC: Large Central Cities

Relative to each district listed at the top of the figure:

↑ : Boston had significantly higher average scale score

= : No significant difference between scale scores

↓ : Boston had significantly lower average scale score

Comparisons with Boston and Large Central Cities

- In grades 4 and 8 mathematics on average Boston scored significantly higher than the Large Central Cities.
- In grades 4 and 8 reading the average score was about the same for Boston and Large Central Cities.

Full information for Boston may be found in Appendix C and scale scores for each district may be found in Appendix D.

Comparisons with TUDA Districts

- Performance in Boston in Grade 4 and 8 reading and mathematics is significantly higher than that in three other urban districts (Cleveland, Los Angeles, District of Columbia).
- Performance is about the same in grade 4 reading in Atlanta, Houston, New York, and San Diego and mathematics in Houston, NYC and San Diego.
- Scores are about the same in grade 8 reading as Austin, Chicago, Houston, New York and San Diego and in mathematics as Houston.
- Performance for Boston in grade 8 math is significantly higher than all but three other districts (Austin, Charlotte and Houston).
- In reading and mathematics for almost all comparisons, performance is significantly lower than that in Austin and Charlotte. The exception is grade 8 reading which is the same as Austin.

(2) Percentage of Students Performing At or Above Proficient on 2007 NAEP: Changes from 2003 and 2005

	Grade 4						Grade 8					
	Reading			Mathematics			Reading			Mathematics		
	% 2007	Change Since 2003	Change Since 2005	% 2007	Change Since 2003	Change Since 2005	% 2007	Change Since 2003	Change Since 2005	% 2007	Change Since 2003	Change Since 2005
<i>Large Central Cities</i>	22	3*	2*	28	8*	4*	20	1	0	22	6*	3*
Atlanta	19	5	2	20	7*	3*	13	2	1	11	5*	4*
Austin	31	NA	3	40	NA	0	29	NA	2	34	NA	1
Boston	20	4	4	27	15*	5*	22	0	-1	27	10*	4*
Charlotte	35	4	2	44	3*	0	29	-1	5	34	2	1
Chicago	16	2	2	16	6*	3	19	4	2	13	4	2
Cleveland	9	0	-1	10	0	3	11	1	1	7	1	1
Houston	17	-1	-4	28	10*	2	18	4	1	21	9*	5*
Los Angeles	13	2	-1	19	6*	1	13	2	0	14	7*	3*
N.Y.C.	25	3	3	34	13*	8*	20	-2	0	22	2	2
San Diego	26	4	4	35	15*	6*	23	3	0	24	6*	2
Distict of Columbia	14	4	3	14	7*	4*	12	2	0	8	2*	1

* Change was statistically higher in 2007 than in prior years.

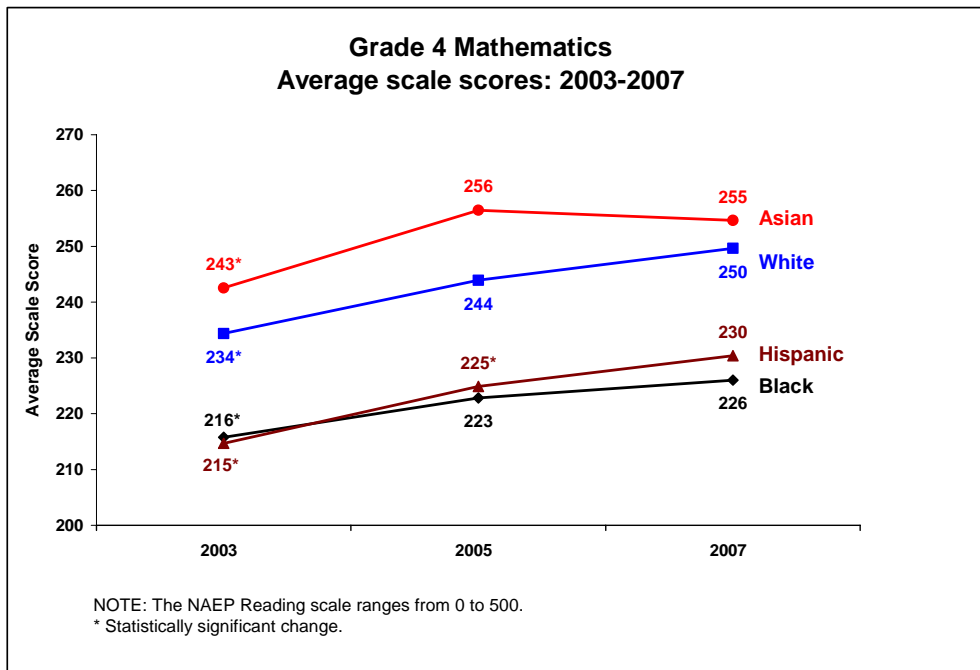

Improvements: Relative to LCC

- In reading for grade 4 Boston exceeded the improvement in Large Central Cities, while at grade 8 there was a slight decline, although none of these changes was statistically significant.
- In mathematics for both grades 4 and 8, there were statistically significant improvements in Boston, and the increases were higher than LCC. In Boston, since 2003, grade 8 increased 10 percentage points and grade 4 gained 15 percentage points.

Improvements: Relative to Other TUDA Districts

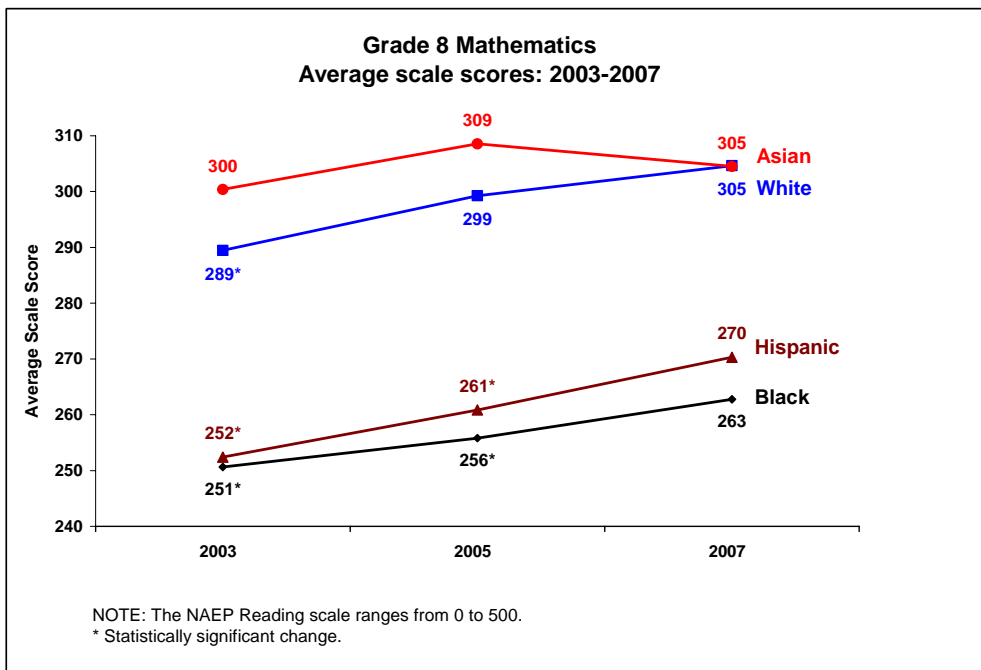

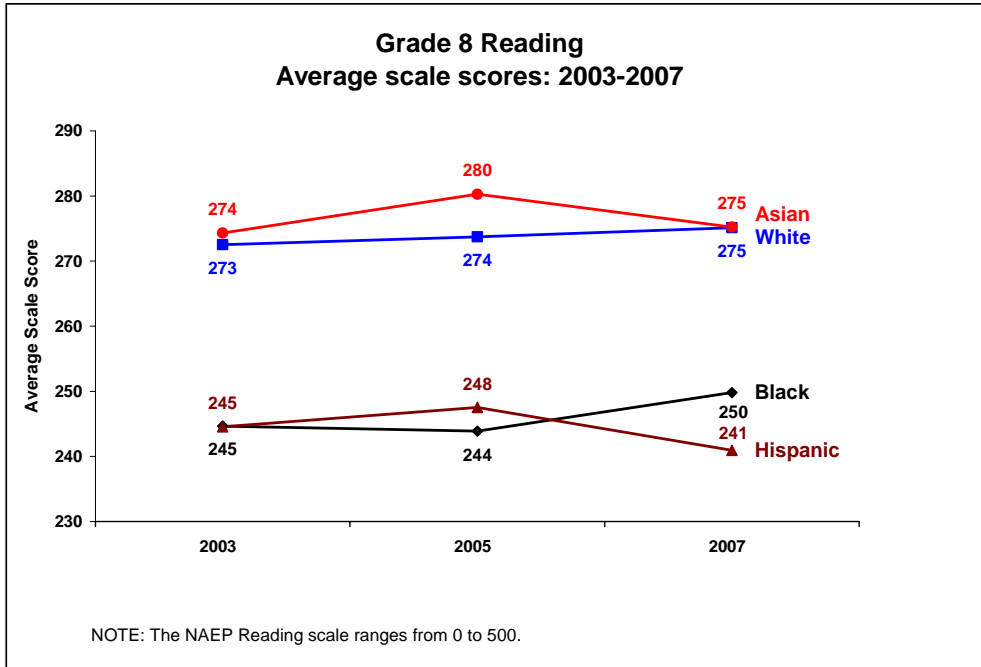

- Since 2003, Boston has continuously made progress in reading in both grades 4 and 8. The improvement in percentage of students scoring at or above proficient in grade 4 (4 percentage points) for Boston was ranked second and tied with Charlotte, Chicago, San Diego and DC, while in grade 8 (1 percentage point) the improvement was in the middle range.
- In mathematics, Boston had the most improvement among the TUDA districts, ranked first in both grades 4 and 8 but tied with San Diego in grade 4. The percentage of students scoring at or above proficient for Boston has substantially increased since 2003, 15 and 10 percentage points, respectively.

(3) Improvement Overtime by Racial/Ethnic Group

Grade 4:

- From 2003 to 2007 scale score gains were seen for all racial/ethnic groups in Reading and ranged from 2 points (Hispanic) to 6 points (Asian), however, these gains were not statistically significant.
- In Mathematics, statistically significant improvement was seen for all groups. Gains ranged from 10 points (Black) to 16 points (White) compared to 2003 performance.

Grade 8:

- Reading scores improved overtime for most groups. Although not statistically significant, improvements ranged from 1 point (Asian) to 5 points (Black). Hispanic performance decreased by 4 points.
- Statistically significant improvement was seen for all groups except Asian in Mathematics. Compared to 2003 performance improvements ranged from 5 points (Asian) to 18 points (Hispanic).

- It should be noted that although improvements have been observed across the groups and are significant in Mathematics at both grades 4 and 8, the gaps in performance remain between Whites/Asians and Blacks/Hispanics.

Full information is contained in Appendix E.

(4) Low-Income Students: Comparison Between Districts and Nation

As a means of examining the performance of low-income students across grades, subject areas and districts, the following analyses examine the differences between each district and the nation. For these analyses the performance of low-income students in each district is compared to that of low-income students nationwide.

Scale Score Performance and Difference of TUDA District and Nation: Students Receiving Free-Reduced Price Lunch

Grade 4				
District (average scale score) (Reading), (Mathematics)	Reading		Mathematics	
	# Points lower	# Points Higher	# Points lower	# Points Higher
Atlanta (198), (216)	-7		-12	
Austin (203), (229)	-2			+2
Boston (207), (231)		+2		+3
Charlotte (205), (231)		#		+4
Chicago (197), (216)	-8		-11	
Cleveland (198), (215)	-7		-12	
Distict of Columbia (188), (207)	-17		-20	
Houston (201), (231)	-4			+4
Los Angeles (191), (217)	-14		-10	
N.Y.C.(209), (234)		+4		+7
San Diego (198), (224)	-6		-3	

* District minus Nation (205), (227)
Rounds to zero.

- In reading, the low-income students in Boston scored 2 scale score points higher than low-income students nationwide and were scored the second highest of the TUDA districts.
- In Mathematics, low-income students in Boston scored 3 points higher than the nation and were in the middle range of other TUDA districts.

**Scale Score Performance and Difference of TUDA District and Nation:
Students Receiving Free-Reduced Price Lunch**

Grade 8				
District (average scale score) (Reading), (Mathematics)	Reading		Mathematics	
	# Points lower	# Points Higher	# Points lower	# Points Higher
Atlanta (240), (251)	-7		-14	
Austin (240), (267)**	-7			+2
Boston (249)**, (271)		+2		+6
Charlotte (245)**, (265)**	-3			#
Chicago (247)**, (257)	-1		-8	
Cleveland (246)**, (257)	-1		-8	
District of Columbia (234), (243)	-13		-22	
Houston (247)**, (268)		#		+3
Los Angeles (237), (254)	-10		-11	
N.Y.C.(246)**, (267)**	-1			+2
San Diego (236), (260)**	-11		-5	

* District minus Nation (247), (265)
 ** The score point different between this district and the nation was not statistically significant.
 # Rounds to zero.

- For both reading and Mathematics low-income students in Boston scored on average 2 and 6 points higher than the nation.
- The Performance for children in poverty was the highest of all TUDA districts in both subject areas.

APPENDIX A: Assessment Framework

Reading

The NAEP reading framework, which defines the content for the 2007 assessment, was developed through a comprehensive national consultative process and adopted by NAGB. The reading framework is organized along two dimensions, the context for reading and the aspect of reading. The context for reading dimension is divided into three areas that characterize the purposes for reading: reading for literary experience, reading for information, and reading to perform a task. The aspects of reading, which define the types of comprehensive questions used in the assessments, including forming a general understanding, developing an interpretation, making reader/text connections, and examining content and structure. Each student read one or two passages and responded to approximately 13-20 questions in 50 minutes.

Mathematics

The NAEP mathematics framework, which defines the content for the 2007 assessment, was developed through a comprehensive national consultative process and approved by NAGB. The mathematics framework calls for the assessment to include questions based on five mathematics content areas: 1) number, properties, and operations; 2) measurement; 3) geometry; 4) data analysis, and probability; and 5) algebra. In addition, the framework specifies that each question should measure one of three mathematical abilities. The three mathematical abilities specified by the framework are: 1) conceptual understanding, 2) procedural knowledge, and 3) problem solving.

Accommodations

It is NAEP's intent to assess all selected students from the target population. Beginning in 2002, students with disabilities and limited-English-proficient students who require accommodations have been permitted to use them in NAEP, unless a particular accommodation would alter the skills and knowledge being tested. For example, in a reading assessment, NAEP does not permit the reading passages to be read aloud.

Population Tested

Results from the 2003, 2005 and 2007 Trial Urban District Assessment are reported for the participating districts for public-school students at grades 4 and 8. The TUDA employed larger-than-usual samples within the districts, making reliable district-level data possible. The samples were also large enough to provide reliable estimates on subgroups within the districts, such as female students or Hispanic students. Because students were sampled, all analyses are examined for significant significance.

In Boston, students from 64 schools at grade 4 and 34 schools at grade 8 participated in the 2007 NAEP assessments. A total of 2,471 students were assessed in reading (1,305 at grade 4 and 1,166 at grade 8) and 2,422 students were assessed in mathematics (1,319 at grade 4 and 1,103 at grade 8).

(Intentionally left blank)

Appendix B

NAEP vs. MCAS

Introduction

Under the federal *No Child Left Behind Law* (NCLB) and state *Education Reform Law of 1993*, Boston Public School students are required to participate in two testing programs: the National Assessment for Educational Progress (NAEP) and the Massachusetts Comprehensive Assessment System (MCAS). The biennial NAEP Trial Urban School District Assessment (TUDA) provides important information for understanding the effective of BPS school system relative to other large urban school districts, while the annual MCAS test provides critical information about the academic performance of BPS compare to other Mass. Public schools as well as to what extent BPS students achieve the Mass. Curriculum standards.

This section is to briefly compare MCAS with NAEP, and to build understanding for interpreting the test results and making the comparisons and/or connections.

Overview

NAEP

- The National Assessment of Educational Progress (NAEP), known as the Nation's Report Card, is Congressionally-mandated assessment since 1969. It includes state assessment since 1990 and conducted the first Trial Urban School District Assessment (TUDA) in 2002. Based on policy set by the National Assessment Governing Board (NAGB), NAEP measures what students know and can do in key subject areas.

MCAS

- The Massachusetts Comprehensive Assessment System (MCAS), fulfilling requirements of the Education Reform Act of 1993, is the Commonwealth's statewide assessment program for public schools since 1998.

Requirements for Student Participation

Student Selection

NAEP

- Based on sampling, a representative sample from randomly selected schools must participate in NAEP testing. For Trial District Assessment, the target sample sizes per subject per grade is 1200-1400 students. About 60 students, 30 per subject, at each participating school are tested.

MCAS

- All Massachusetts public school students in the grades tested must take the MCAS tests.

Student Participation

NAEP

- Beginning in 2003, school receiving Title I subgrants are required to participate in the biennial NAEP assessments in reading and mathematics at grades 4 & 8 if selected for the NAEP sample. Under NCLB, parental notification prior to testing is mandatory to inform parents of students who are sampled that their child's participation is voluntary.

MCAS

- Every public school student is mandated to take the test. Passing grade 10 ELA and Math tests is a part of graduation requirement.

Inclusions & Accommodations

NAEP

Includes students with disabilities and English Language Learners (ELL) students in the assessment.

- **ELL:** NAEP includes all ELL students who have received instruction in English for at least three years. ELL students who have received instruction in English for less than three years are included as well unless school staff judged them to be incapable of participating in the assessment in English. In the NAEP mathematics assessment, bilingual test booklets (English and Spanish) are provided where needed.
- **Students with Disabilities:** Based on student's IEP, students with disabilities are tested with appropriate accommodations unless the student's IEP team judges that he or she cannot participate or if NAEP does not allow an accommodation that the student requires.

MCAS

Includes students with disabilities and limited English Proficient (LEP) students in the assessment.

- **LEP:** Beginning in 2003, the new laws, *No Child Left Behind Law* as well as *Question 2*, the Massachusetts ballot initiative approved by voters November 2002, require that all LEP students participate in state administered academic assessments, with the sole exception of LEP students in their first year of enrollment in U.S. schools. Schools have the option of administering the reading, LEP and History/Social Science tests to first-year LEP students.
- **Students with Disabilities:** The vast majority of students with disabilities take standard MCAS tests, either with or without accommodations as specified in their IEP plan. Only a very small number of students with the most significant disabilities take the MCAS Alternate Assessment.

Test Content/Instrument Design

Framework

NAEP

The content and design of NAEP assessments were constructed based on the Frameworks that were developed by the National Assessment Governing Board (NAGB).

- **Reading:** The 2002 updated NAEP Reading Framework
- **Math:** The 1996 updated NAEP Mathematic Framework

MCAS

The content knowledge and skills tested by MCAS were based on the learning standards in the Massachusetts Curriculum Framework for these content areas.

- **English Language Arts:** Massachusetts English Language Arts Curriculum Framework, June 2001 and May 2004 Supplement
- **Math:** Massachusetts Mathematics Curriculum Framework, November 2000 and May 2004 Supplement

Content Standards Tested

NAEP

Reading: assesses three contexts for reading

- Reading for literary experience
- Reading for information
- Reading to perform a task

Mathematics:

- number, properties, and operations;
- measurement;
- geometry;
- data analysis and probability;
- algebra

MCAS

English Language Arts

- Language
- Reading and Literature
- Composition
- Media

Mathematics:

- Number Sense and Operations;
- Patterns, Relations, and Algebra;
- Geometry;
- Measurement;
- Data analysis, Statistics and Probability

Test Construction

NAEP

- Matrix sampling, Long test short booklet, each student gets a small part of the test. Thus, no individual student scores.

MCAS

- Every student gets the same test booklet that contains both common items and matrix sampling items. All students receive scores based on common items only.

Type of Questions

NAEP

- **Reading:** Multiple-Choice, Short and extended constructed response questions.
- **Math:** Multiple-Choice, short-answer open-ended, extended open-ended tasks.

MCAS

- **ELA Reading Comprehension:** Multiple-Choice, Open-ended.
- **English Language Arts:** Multiple-Choice, Open-ended, & Writing Prompts.
- **Math:** Multiple-Choice, short-answer, open-response items.

Test Questions release

NAEP

- For each subject, only selected test questions are released to public. For current year and historical released test questions, please visit: <http://nces.ed.gov/nationsreportcard/itmrls/>

MCAS

- For each subject, **all** common items are released to public. For current year and historical released test items, please visit: <http://www.doe.mass.edu/mcas/testitems.html>

Testing Administration

2007 NAEP

Same for National NAEP, State NAEP, and Trial Urban District Assessment (TUDA) NAEP

Testing Date: 1/22/2007 – 3/2/2007

Testing Time (per subject): 50 minutes

Subject & Test Grade:

- Reading – Grades 4 & 8
- Mathematics – Grades 4 & 8

Test Administering: The NAEP Representative from NAEP data collection contractor is responsible for all assessment activities including coordinating, conducting, and sending test materials to the scoring facility.

Test Sequence: Reading and Mathematics are conducted simultaneously in the same classroom; some students take Reading, the other students take mathematics test.

2007 MCAS

Testing Date:

- ELA Composition test: 3/20/2007 (make-up 4/2/2007)
- ELA Reading Comprehension (G3-8, & 10): 3/19/2007 – 4/4/2007
- All other content area tests: 5/14/2007 – 6/6/2007

Testing Time (per subject): Un-timed

Subjects & Test Grade:

- ELA Reading Comprehension – Grades 3, 5, 6, & 8
- English Language Arts – Grades 4, 7, & 10
- Mathematics – Grades 3-8 & 10
- Science & Technology/Engineering – Grades 5, 8, & 9/10
- History & Social Science – Grades 5 & 7

Test Administering: School teachers/personnel are responsible for all assessment activities.

Test Sequence: All students take the same test in the same classroom.

Scoring

NAEP

- Short constructed-response questions are scored as either 'acceptable' or 'unacceptable,' or received partial credit according to a three-level rubrics.
- The extended constructed-response questions are rated based on a four-level rubrics.

MCAS

- Multiple-choice and short-answer questions are scored blank/0 or 1.
- Open-response questions are scored on a 0 through 4 scale based on the scoring rubrics except grade 3 Math that is scored 0 to 2.
- Student compositions are independently scored by two scorers on the following criteria: (1) a score of 1–6 in topic development, and (2) a score of 1-4 for the use of standard English writing conventions. Students receive the sum of the scores from each of the two readers.

Data Availability

NAEP

- No student-level results
- No school-level results
- No district-level results (except TUDA)
- Not designed to assess a specific curriculum

MCAS

- Student-level results
- School-level results
- District-level results
- Designed to measure the state's curriculum

Reporting

Performance Standard

NAEP

Three Achievement Levels:

- **Advanced:** Represents superior performance
- **Proficient:** Represents solid academic performance for each grade assessed
- **Basic:** Denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade.

MCAS

Four Performance Levels:

- **Advanced/Above Proficient:** Students at this level demonstrate a comprehensive and in-depth understanding of rigorous subject matter, and provide sophisticated solutions to complex problems.
- **Proficient:** Students at this level demonstrate a solid understanding of challenging subject matter and solve a wide variety of problems.
- **Needs Improvement:** Students at this level demonstrate a partial understanding of subject matter and solve some simple problems.
- **Warning/Failing:** Students at this level demonstrate a minimal understanding of subject matter and do not solve simple problems.

Scaled Score**NAEP**

- Range: 0 – 500
- Scale Score Corresponding to Performance Level: vary by subject and test grade

Reading:

	<u>Grade 4</u>	<u>Grade 8</u>
Advanced	268 – 500	323 – 500
Proficient	238 – 267	281 – 322
Basic	208 – 237	243 – 280
Below Basic*	0 – 207	0 – 242

Mathematics:

	<u>Grade 4</u>	<u>Grade 8</u>
Advanced	282 – 500	333 – 500
Proficient	249 – 281	299 – 332
Basic	214 – 248	262 – 298
Below Basic*	0 – 213	0 – 261

* Below Basic is not a Achievement level

- Average scaled scores cannot be compared across grades.

MCAS

- Range: 200 – 280
- Scaled Score Corresponding to Performance Level: same for all subjects and test grade

Performance Level

<u>Performance Level</u>	<u>Scaled Score</u>
Advanced	260 – 280
Proficient	240 – 258
Needs Improvement	220 – 238
Warning/Failing	0 – 218

- No scaled score is reported for Grade 3 Reading test instead “raw” score is reported.
- Due to the range of MCAS scores contains different scales, the averaging of scaled scores should be generated based on the average raw score of tested group (i.e., compute the average raw score and find the corresponding scaled score.)

Interpreting Results**NAEP**

- The NAEP results as reported in average scores and percentages are **estimates** because they are based on **samples** rather than the entire population(s).
- Differences in scores must be statistically significant in order to report a change.

MCAS

- Comparisons of performance on subject area subscores across years must be made with caution because the number of items contributing to each subscore is relatively small and the difficulty of the items may vary somewhat from year to year.
